Technical Services Memo

Volume: 18 Number: 5 Date: May 21, 1996

Product Code:	PA
Subject Code:	ME
Part Number:	19C337096G1
LBI:	38384

CATEGORY: PORTABLES

SUBJECT: MPA LCD DISPLAY ASSEMBLY

PROBLEM:
The LCD board assembly used in the early models of MPA portable has been unavailable from Service Parts.

SOLUTION:
The vendor for this part has been revived and is once again supplying replacement LCD boards for the MPA radio. This display is for all early models of MPA radios identified by the battery baseplate. Remove the battery and observe the battery baseplate. If all 6 battery contacts are secured to the baseplate with externally visible screws, the radio requires this 19C337096G1 LCD display. If only one (ground) contact of the six is externally secured with a screw, the newer 19D902814P1 LCD board applies.

Installation of the 19C337096G1 LCD display board is described in LBI 38384. There is one difference between the old and new kits, the 19D438686P1 light diffuser is NOT INCLUDED IN THE NEW KIT and must be retained from the unit under repair for re-use in the new assembly.
