Technical Services Memo

Volume: 18 Number: 12 Date: 07/17/96

Product Code: Various
Subject Code: TQ
Part Number: TQ0609A
LBI: VARIOUS

CATEGORY: TEST EQUIPMENT

SUBJECT: TQ0609A for MPD, MPA, MRK

PROBLEM:

The audio I/O test instrument has been changed.

SOLUTION:

This test instrument was originally designed with a permanently attached MPA/MPD test cable.

1. The permanently attached MPA test cable was removed, and replaced with a DB-15 connector which mates with a similar connector on the new MPA and other test cables.

2. The box was marked TQ0609A for identification, and is shown that way in some publications. The marking has subsequently changed ***back*** to TQ0609 but can be positively identified by the absence of a permanently attached test cable.

The TQ0609A does NOT come with a test cable since it now has multiple applications. Two cables are currently available and must be ordered separately. Test cables for new products are likely to become available in the future, please refer to the Parts and Accessories Catalog.
