Our deepest sympathy to

ICOM II

Part number 19A137763

May it forever rest in "pieces"

Yes, the new ICOM had a short life.

Starting about September 15, 1980, Manufacturing will again return to the old ICOM (19A129393).

Somehow we managed to get the new crystal section of the Service Parts Catalog correct, as it shows the 393 drawing as the one to order.
