

# Technical Services Memo

Volume: 25

Number: 3

Date: January 24, 2003

---

Product Code: B3E SX  
Subject Code: CO DA  
Part Number: 19D902590G6  
LBI: LBI-39176

CATEGORY: Station

SUBJECT: MASTR-Ile optional test meters peg

PROBLEM: Cabinet top Test Meters used with the MASTR-Ile stations are showing their needle pegged or otherwise indicating a false or pulsing condition. This was not a problem with the original system modules, 19D902590G1-3. This appears to become a potential issue as system modules are substituted with the current version, 19D902590G6.

SOLUTION: Inside the System Module, on the 188D5498G1 system board, change R6 from it's original value, to 5620 ohms, p/n 19A702931P273 - RESISTOR FIXED MET FILM SMT 5620 OHM 1%, 0.1W. Typically marked "5621".
