

DELTA and RANGR microprocessor types

19A703241G1 - G8	UHF/VHF narrowband micro
19A 703868G1 - G5 & G7	UHF/VHF wideband micro
19A703244G20 - G23	UHF/VHF Delta and RANGR VHF wideband micro
19A703868G6	Special for RANGR UHF only
19C851149G1 - G4	Low Band narrowband micro
19C851149G5 - G12	Low Band wideband micro
19C851591G1	Low Band narrowband (SOLDER IN FIELD KIT)
19C851591G2 - G3	Low Band wideband (SOLDER IN FIELD KIT)

These micros are found in Delta mobile radios, only the two shown above will be found in the Rangr. The Delta / Rangr PC Programming software will only work when the Delta radio has a wideband micro. The micro is identified as the plug in 40 pin chip with one of the above numbers stamped on it.

The 19A703244G23 was the last released code.
