MT6000E TEST MODE   (MASC and non-MASC models)

To Check the display, the buttons, and the switches, perform the following tests:

(a) Turn radio on.

(b) After the self test is complete, press the bottom button (side button 3, SB3) five times in succession, within 10 seconds; model and serial number will scroll on display.

(c) After "RF TST" appears on the display, press the blue button (SB1), "CH TST" appears on the display.

(d) Next, press and hold the orange button on top of the radio; all segments of the display will light, and the LED on the control top will illuminate a yellowish colour.

(e) Release the orange button; "03/000" appears, which indicates that the switch is in the open condition.

(f) Press the orange button again; "03/001" appears, which indicates that the switch is in the closed condition.

(g) Rotate the channel change knob; "04/000" thru "04/015" appears.

(h) Rotate the concentric switch; "65/000" and "65/001" appears.

(i) Rotate the volume control; "02/000" thru "2/255" appears and radio bleeps in unison.

(j) Press SB1 (blue), view "96/001"; release, view "96/000".

(k) Press SB2 (middle), view "97/001"; release, view "97/000".

(l) Press SB3 (bottom), view "98/001"; release, view "98/000".

(m) Select "A" on toggle switch; view "64/000".

(n) Select "B" on toggle switch; view "64/001".

(o) Select "C" on toggle switch; view "64/002".

To exit test mode, turn the radio off then back on.
