

Pro -97 Parts List

For all RS scanners, there are usually plenty of replacement parts available. The problem is, you can never access a list of these available "repair" parts from rs.com.

You actually have to go into a store and ask the associate the pull up a list of "available RSU parts" for a particular item. They can then print it out for you to enjoy at your leisure... For instance, here is the list of parts currently available for the Pro-97. If it is listed as "in stock," you can order them at any RS store and it will be sent to you in a few days. If it is listed as "not in stock," it is still a stocked part, but the warehouse is out and they should be replenished shortly. Occasionally it can be listed as "not in stock" for months because A: the supplier is lagging, or B: as soon as it becomes "in stock" it sells out again due to existing backorders...
