

National Weather Service Miami - South Florida

Impact Weather Briefing for: Friday, January 22, 2016

WATCHES/ADVISORIES: All of South Florida remains in a marginal risk for severe weather today. Small Craft Advisories are in effect this morning, then Gale Warnings are in effect late this afternoon/tonight through Saturday. A Coastal Flood Advisory is in effect for the Gulf Coast today and Saturday.

OVERVIEW: A fast moving cold front will push through South Florida today. A line of thunderstorms, with a few embedded strong storms are possible into mid-morning west coast, and late morning/afternoon east coast. Behind the front, strong west-northwest winds will create hazardous marine conditions through much of the weekend. Minor coastal flooding is possible along the Gulf coast today and Saturday. Another chilly air mass arrives behind the front, with the coldest temperatures and wind chills Sunday morning.
